

KONICA MINOLTA

Warehouse Management System

Centralized Warehouse · Increase Visibility · Optimize Stock Flow

Managing daily stock movements could be challenging:

Overstock Wastage

Hard to Trace

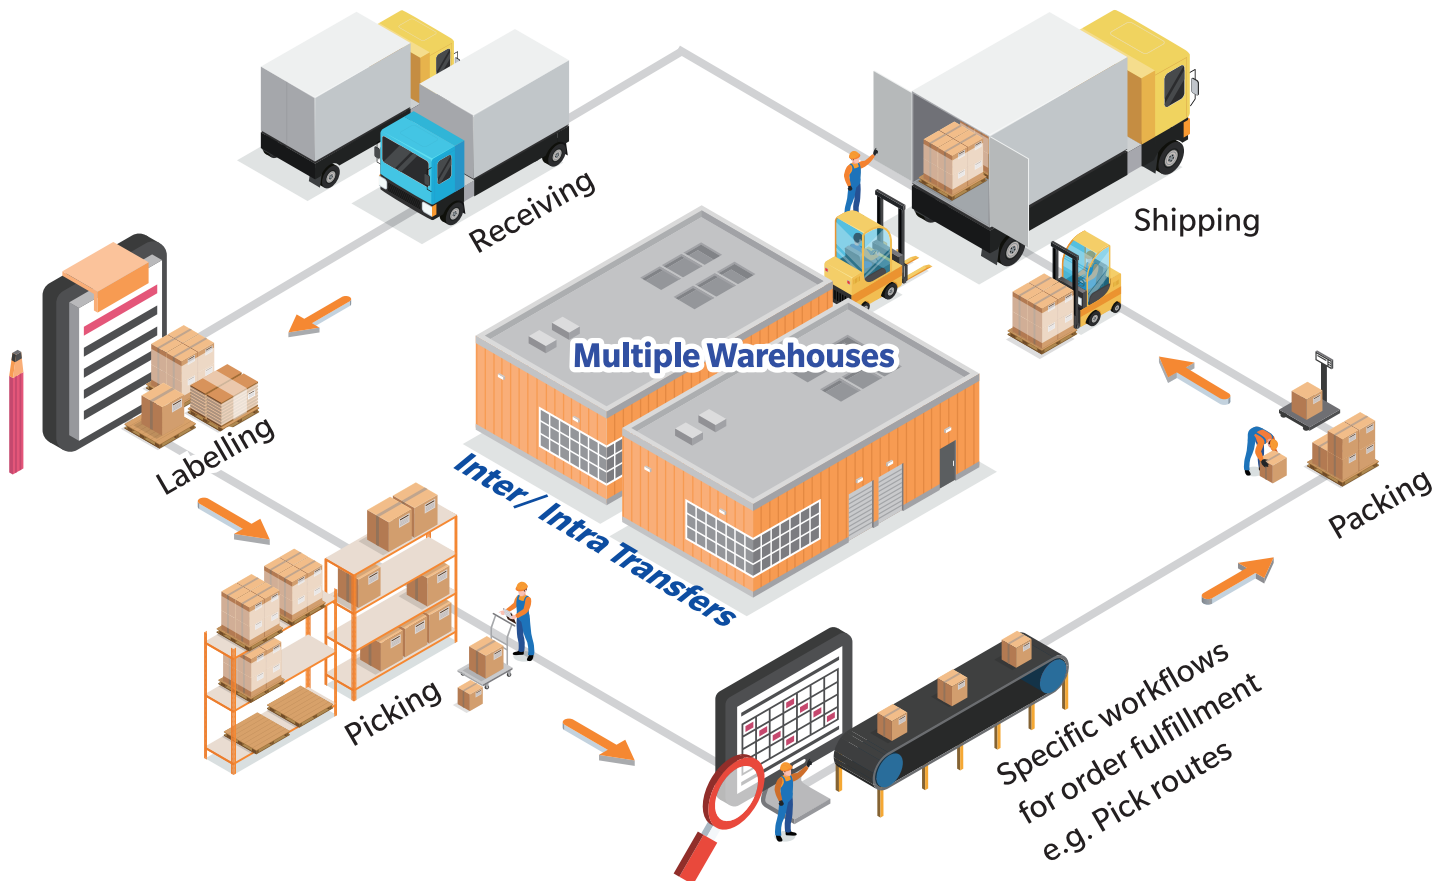

Inaccurate Inventory

Complicated Operations

Solution Overview

Konica Minolta's cloud-based Warehouse Management System (WMS) is designed to optimize the operations of warehouse, goods distribution and supply chain processes by tracking and analyzing inventory flow from receiving to shipping.

Solution Highlights

Multi-site Warehouse Management

Order Picking & Fulfillment

Segment product location to increase agility and capability to fulfill and return anywhere

Centralize warehouse operations to maximize space utilization and minimize investment cost

Warehouse Transfer / Movement

Optimize resource usage and material flows with quantity control

Stock Take & Inventory Tracking

Manage stock in/out activities and inventory status with real-time update

Report & Forecast

Able to integrate with other systems to provide detailed data reports

Item Flow Transparency

Create rules to record the items flow and to ensure the whole process efficiency

Why Konica Minolta?
