

KONICA MINOLTA

Grow your Business with ***bizCloud***

Your business operation can be significantly affected if your staff have difficulties in getting to office due to traffic disruption or disaster; but setting up remote access may require IT expertise and become costly. Allowing your staff using smartphone to access company data could raise security concerns if it is lost or stolen. With limited IT professionals, how could you manage all these in a simple and an effective way?

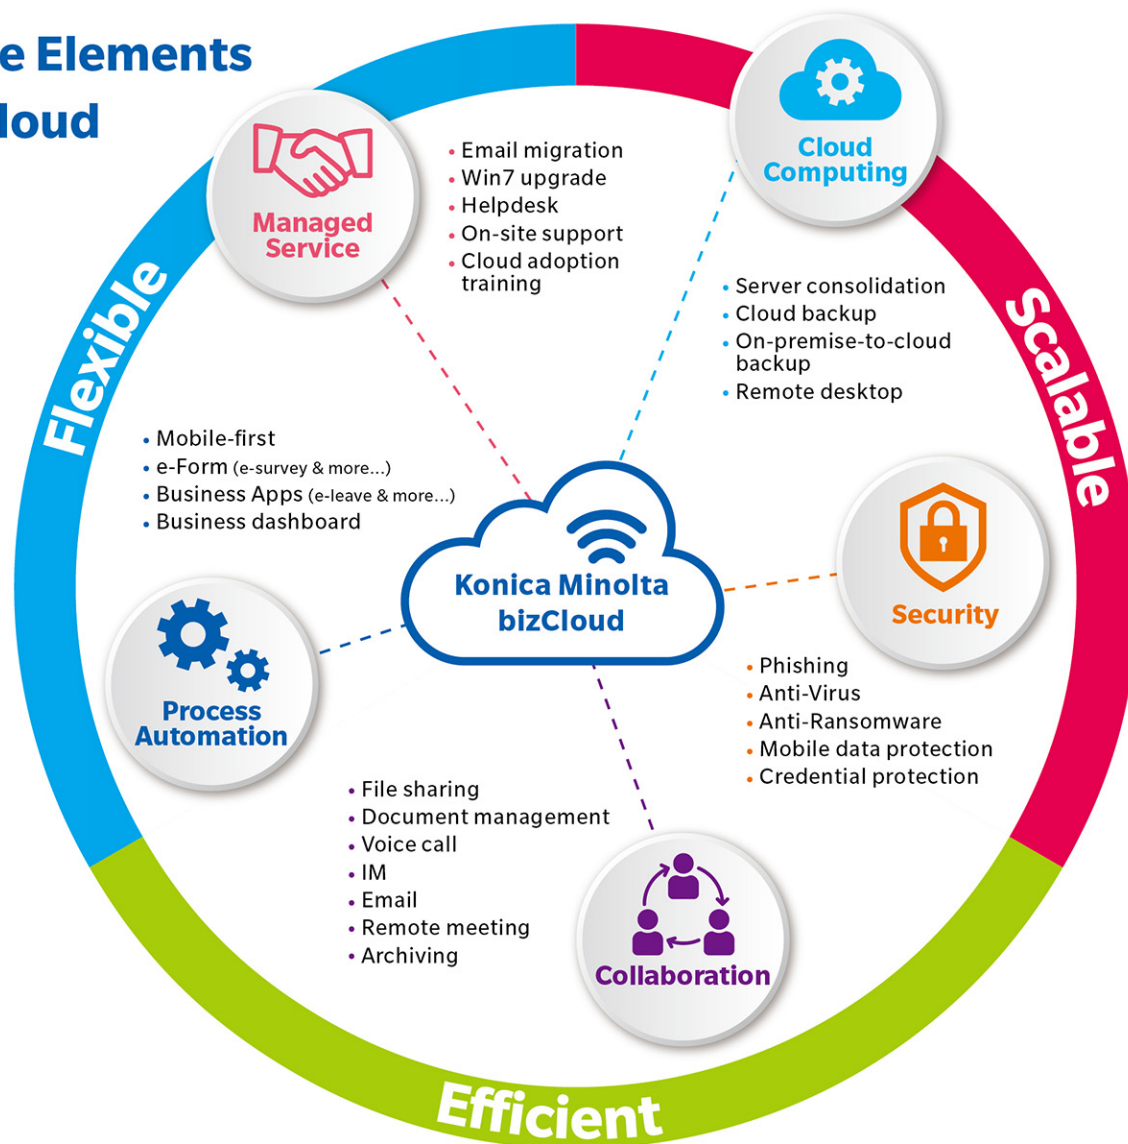

Multi-vector,
enterprise-graded security

Cost saving via
subscription-based model

Productivity
boosted

Start small & scale up with
your business growth

5 Core Elements of bizCloud

Case Sharing

Background

- A Japan-based retail company in Hong Kong with around 50 employees.
- Encountered ransomware attack few months ago.
- Lack of IT knowledge, staff only manually backup company data on an occasional basis.
- Existing email server was frequently down and emails were always lost.
- Their IT outsourcing service provider offered very limited support.
