

MOBOTIX

High-performance Thermal Detection System

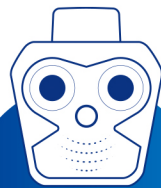

Unparalleled Weather-proof Video Security Solution

MOBOTIX is a German-made revolutionary thermal detection recording system, which combines the functions of all-rounded thermal detection with high-resolution video surveillance.

MOBOTIX M16 contains a range of sensors and a powerful AI system that analyses data, logically links to a computer system and initiates actions to defend against hazards.

Trustworthy

20 years of
video recording
experience

Benefits

Energy efficient

Low power
consumption

All-round view

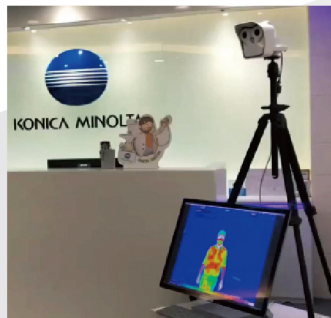

Detect moving
people accurately

Easy to operate

No additional
software is required

Wall-mounted

Pole mount

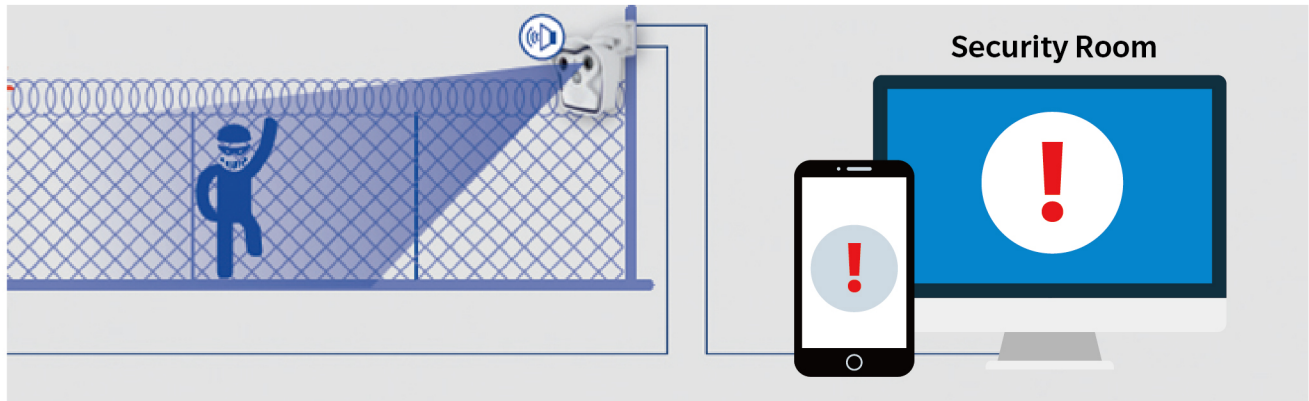

Applications during COVID-19

- Placed at reception areas or entrances to monitor body temperature of staff, students or visitors

- Reduce the risk of infection by instant alert
- Use contactless temperature detection method to reduce human contacts
- Provide a safe working environment for staff

Supplementary Function – Surveillance System

Attributing to its intelligent monitoring and recording system, MOBOTIX is able to provide reliable surveillance of indoor or outdoor areas. Even in total darkness, it can make accurate judgement of the environment by differentiating people and objects.

Trigger alarms to notify the person in charge at once when an intruder is detected

Notify the person in charge via computer or mobile applications

Benefits

Video analysis and recording functions

Dim light operation mode

Long operation hours

Dust- and waterproof

SYSS certified

Why Choose Konica Minolta?

With our subscription-based model, you can get started at a minimal cost. Our professional team is capable of developing custom apps that suit your specific business needs.
