

KONICA MINOLTA

Facial Recognition Printing Solution

The future of secure and convenient printing

You may face the following challenges:

Escalation of Security Risks

Growing Concerns about Data Breaches

Raise Awareness on Hygiene and Safety

Introduction:

Konica Minolta Facial Recognition Printing Solution has revolutionized the way we interact with printing systems. Users no longer need to hassle with remembering passwords or carrying access cards. Instead, they can enjoy a seamless and secure printing experience with facial recognition technology.

How it works:

- 1** Step in front of the facial recognition device.
- 2** Advanced facial recognition algorithm analyzes your unique facial features.
- 3** Your identity is quickly verified and authenticated.
- 4** Access to printing functions and confidential documents is granted instantly.
- 5** Enjoy a smooth and hassle-free printing experience.

Features

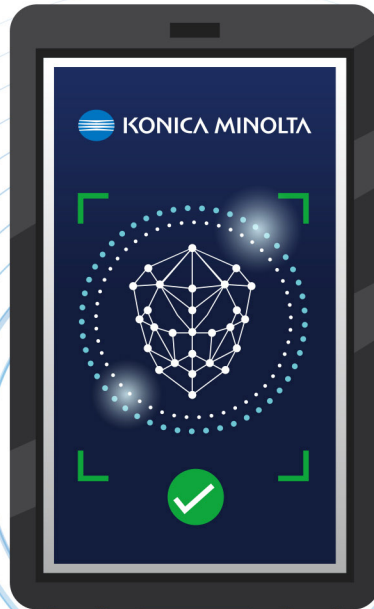

Security Enhancement

through the unique facial features of individuals

Masked Face Recognition

by using deep learning technology

User-Friendly Printing Experience

is ensured by skipping complicated login procedures

Seamless Integration

with your existing MFPs and network infrastructure

Time and Cost Saving

as no password or access card is required

Benefits

Enhanced Security

Protect confidential documents with the highest level of authentication

Convenience and Efficiency

Enjoy a streamlined printing experience with facial recognition technology
