

KONICA MINOLTA

RFID Asset Management Solution

Creating Comprehensive View for Smarter Decision Making

Managing assets could be challenging:

Labor intensive in managing diverse assets

Assets across multi-location

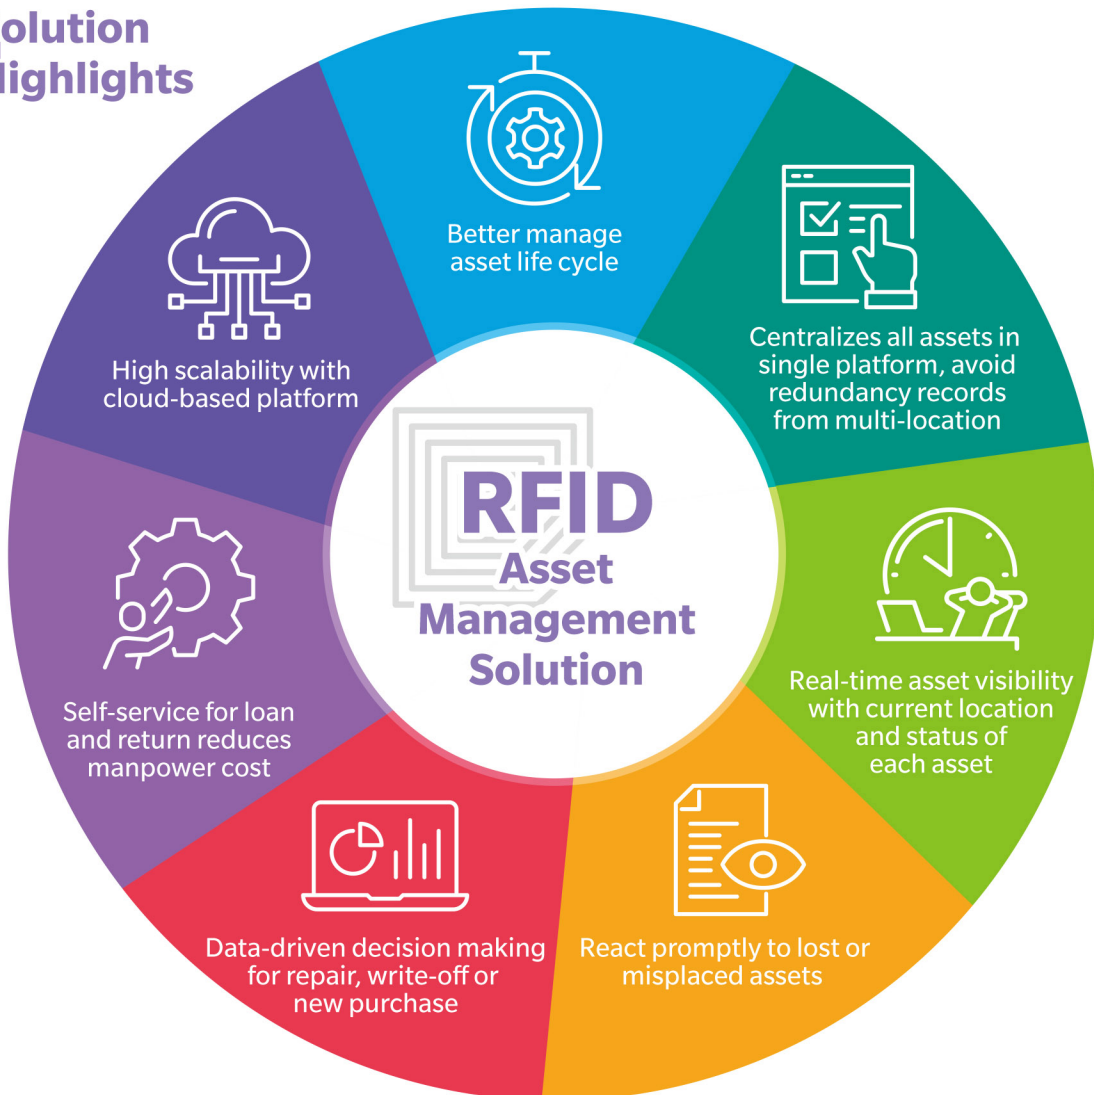

Hybrid office complicates control

Pressures due to financial closing

RFID technology goes beyond inventory and access control, finding extensive use in asset management. By utilizing RFID with Konica Minolta's professional experts, organizations can effectively track and manage their assets, improving overall asset utilization and minimizing loss.

Solution Highlights
